BIG TWIG HOMES

# Multi-family drawing checklist

Prepare one common drawing list for the developer, design team, builder and supplier.

## Buildings, dwellings and stories

Give each building a label. List units and stories per building and the project town and state.

## Repeated or mirrored units

Name each unit type. Identify differences in openings, entries, orientation and shared walls.

## Drawing set and design contacts

List plan, elevation and wall-section sheet numbers and dates. Note who confirms revisions.

## Procurement and delivery

Note the bid milestone, delivery sequence, access and unloading contact for each phase.

## Phase or unit schedule

Use one line per building or phase. Record building label, unit mix and proposed delivery order.
